Dec. 2020

The year 2020 will have been a milestone in very many aspects for most of us. The "health crisis" and how it has been handled by the different governments and influencers has generated a lot of fear and division; we got bluntly faced with something that has always been there: the permanence of change and our illusion of control.

Despite our currently very unstable environment, we have succeeded in developing the bonds among our community members, through four in-person gatherings at or around Masia de Matuta, 2 additional visit days for newcomers, and many zoom meetings throughout the year: our every Wednesday 5pm meeting to connect and get the latest update on our commun project, our every Sunday 10am meditation meeting, the business plan/photovoltaic/biomasse meetings, the investors' meetings, the newcomers' meetings, the organization meetings for our gatherings...

We have started to live a community life at the gatherings and the virtual meetings where we got to know each other better, to work together, to share practices so to feel connected, centered and supported, especially during these challenging uncertain times, where we have to adapt each day and increase our capacity to live in the moment, with its joys and its pains.

Today, our community counts:

Core Group	members in the core group who have committed to become a member of the community by buying their share in the cooperative.
Main WhatsApp	34 p. members strongly interested (Tantric Community Spain Whatsapp group)
Current Newcomers	39 p. persons who joined newcomers' meetings this year
AMITA members	persons who have taken their membership in our association AMITA, as cooperative members, or as interested or supporting members.
Facebook group	171 p.

We are happy to announce that our investors could negotiate and agree on a buying price for Masia de Matuta! The signature of the pre-purchase contract is pending and the investors have already registered the company name "AMITA ASSET MANAGEMENT, S.L." under which they will buy and own the property. We would also like to outline that all investors will be full cooperative members of the community.
